

# Swim Molds

***Create a custom seal to prevent water from entering the ear canal.***

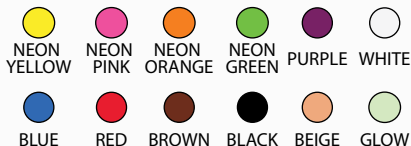

The prevention of moisture entering the ear canal is an important consideration. Many people with chronic conditions such as, drainage or swimmer's ear must keep their ear canals dry to prevent severe problems from developing. Oto Swim molds will create a tight seal to prevent water from entering the ear canal, minimizing these medical issues.

Oto's Swim Molds are manufactured from a soft, 100% floatable silicone in a velvet matte finish. These molds are available in twelve fluorescent colors with the option of swirling two to three colors. All orders include a lightweight wrist pouch.

## ***Swim Molds are ideal for:***

- Water Sports
- Recreational swimming
- Daily showering
- Children who have tubes in their ears
- Individuals who suffer from chronic ear infections
